Outline for March 12, 2012

1. Midterm #2 Review
2. Recursion review
     a. Base case (terminating case)
     b. Recursive call
3. Example: list of permutations of string [*perm.py*]
     a. Base case: empty string gives list of empty string
     b. Recursive part:
          i. Remove first letter
          ii. Generate list of permutations of rest of string
          iii. New list: first letter in all positions for all elements of list
