Outline for November 28, 2012

Reading: §15   **Due Date Changed! Assignment due:** Friday, November 30, 2012 at 11:59 PM

1. More on files
2. Examples
    a. Put lines in a file in random order [*randlines.py*]
    b. Read in a list of words from a file, then search it as requested; similar to linear search program done last week [*search-1.py*]
    c. Now see how many words you checked total [*search-1c.py*]
3. Reading a URL [*geturl.py*]
    a. Opening a URL
    b. Reading the page as a string (utf-8, us-ascii, iso-8859-1, *etc.*)
    c. Note what happens if you leave off the `decode()` (note the `b'...'`) [*geturl2.py*]
