Counting

- While loop
- For loop

```
# Counter
# Demonstrates the range() function

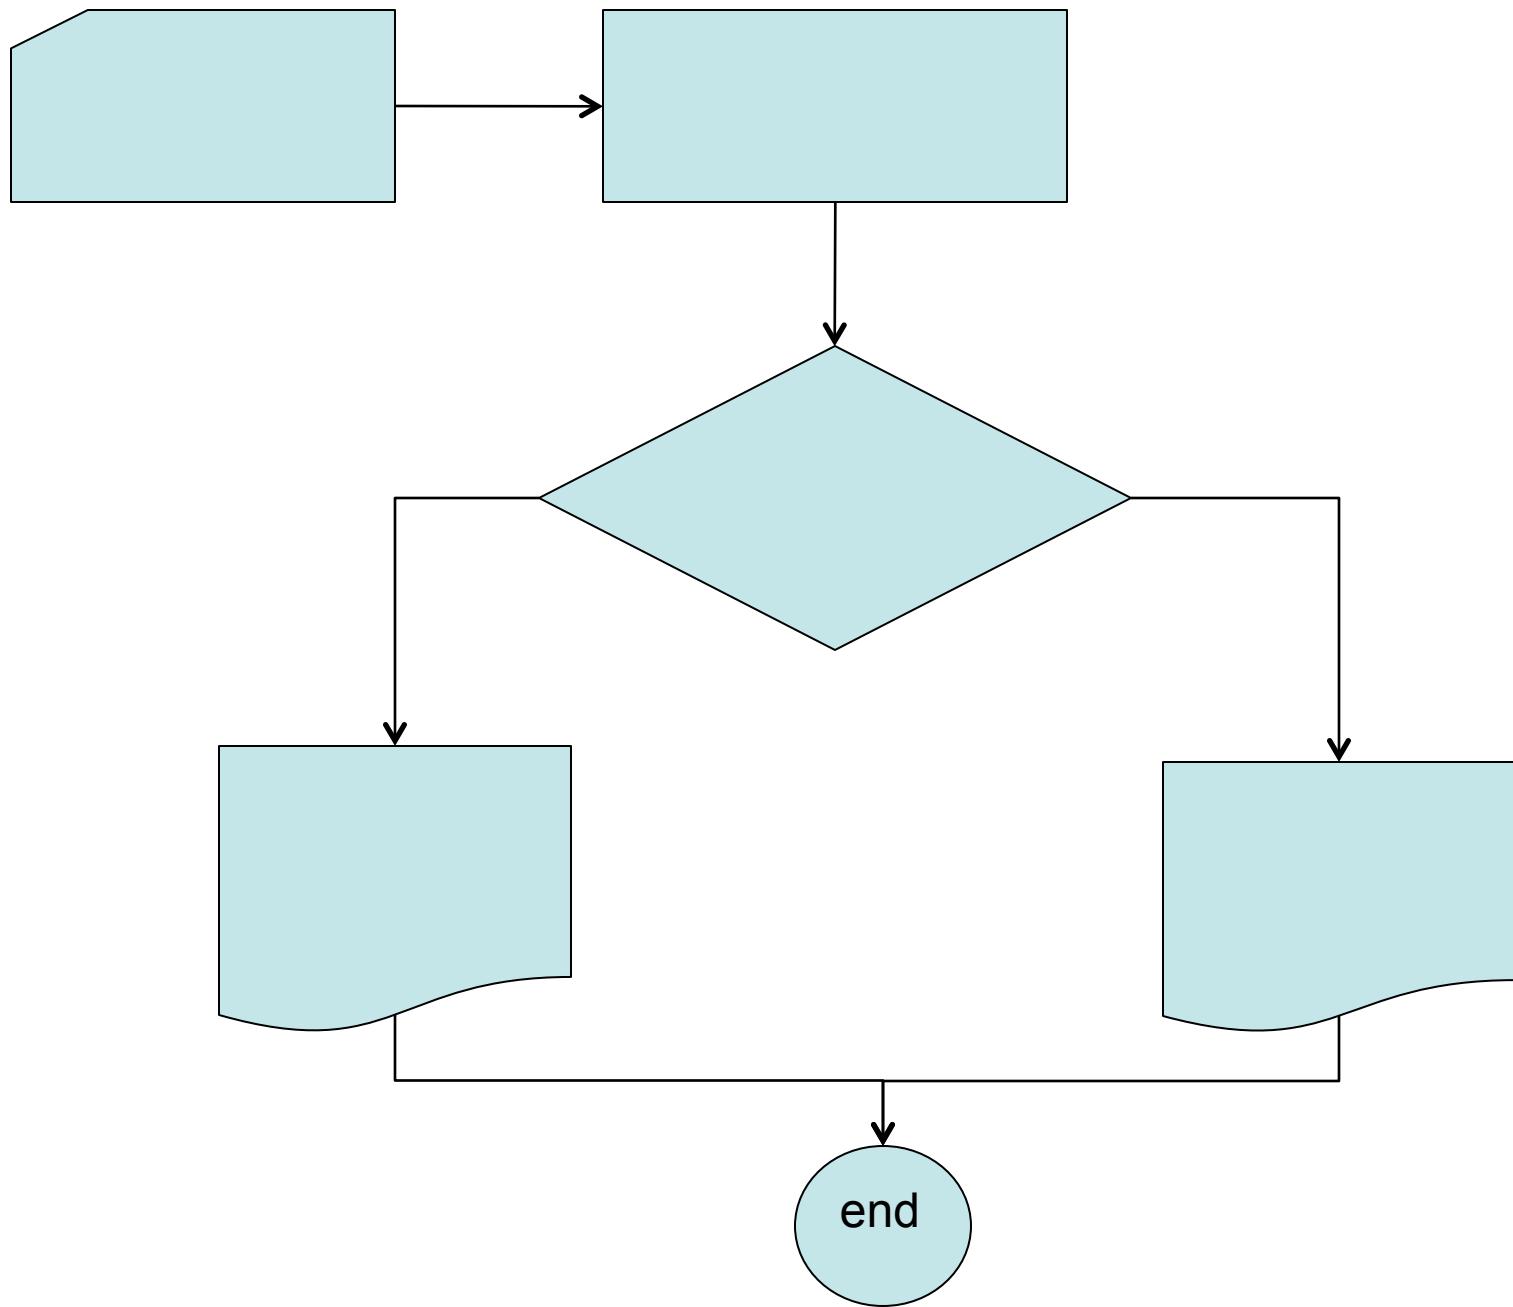

print "Counting:"
i = 10
While i > 0:
    print i,
    i = i - 1

for i in range(10): // (0, 10, 1) (start, exit, change)
    print i,

print "\n\nCounting by fives:"
for i in range(0, 50, 5):
    print i,

print "\n\nCounting backwards:"
for i in range(10, 0, -1):
    print i,

raw_input("\n\nPress the enter key to exit.\n")
```

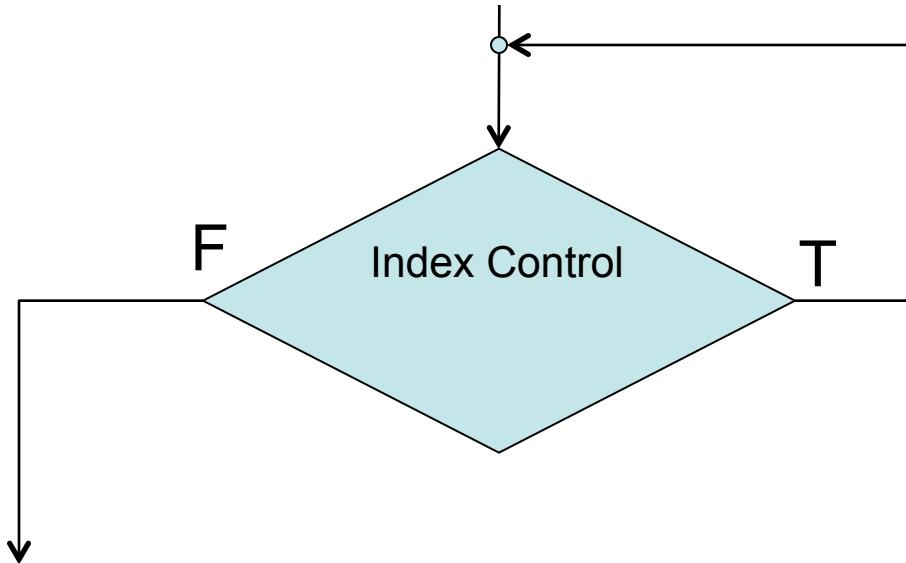

```
# Loopy String
# Demonstrates the for loop with a string

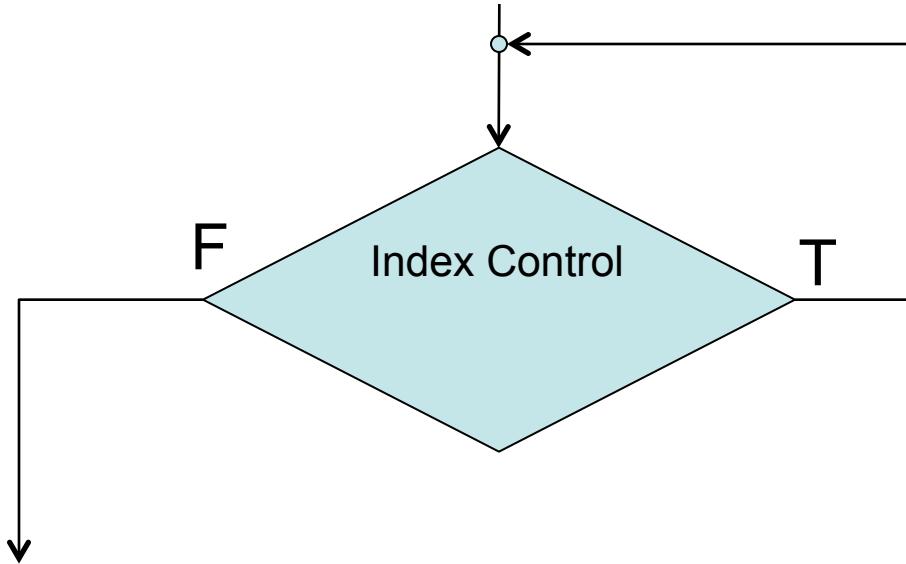

word = raw_input("Enter a word: ")

print "\nHere's each letter in your word:"
for letter in word:
    print letter

raw_input("\n\nPress the enter key to exit.")
```

```
for <index_variable> in <index control>:  
    <statement>  
    <statement> (optional)  
<other statements>
```

```
for <integer_variable> in range (start, end, skip):  
    <statement>  
    <statement> (optional)  
<other statements>
```

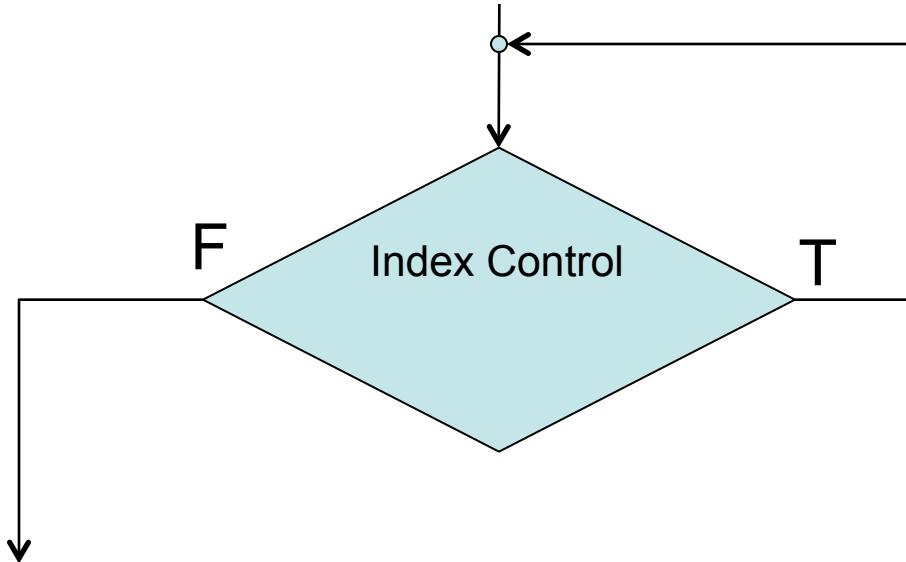

```
# Password
# Demonstrates the if structure
print "Welcome to System Security Inc."
print "-- where security is our middle name\n"

password = raw_input("Enter your password: ")
numberOfTry = 1;
while (password.lower() != "secret") & (numberOfTry < 3):
    print "Access Denied -- tried ", numberOfTry, " times."
    password = raw_input("Enter your password: ")
    numberOfTry = numberOfTry + 1;
    if (pass... == "secret"):
