
Outline for the Day

Reading: handout

1. Greetings and felicitations!
 - a. Puzzle of the day
2. Robust library
 - a. Tokens and their generation and analysis
 - b. Functions
3. Common Implementation Vulnerabilities
 - a. Unknown interaction with other system components (DNS entry with bad names, assuming *finger* port is *finger* and not *chargen*)
 - b. Overflow (year 2000, *lpr* overwriting flaw, *sendmail* large integer flaw, *su* buffer overflow)
 - c. Race conditions (*xterm* flaw, *ps* flaw)
 - d. Environment variables (*vi* one-upsmanship, *loadmodule*)
 - e. Not resetting privileges (Purdue Games incident)
