

INSuRE Project: “Name of Project”

Date: _____

Team member names, technical director and agency

Overview of project

- Project summary

Operational capability and status

- What functionality has been done
- What functionality remains to be completed

Technical approach

- Current technical approach to implement functionalities
- Current problems being worked through, questions on future approaches if necessary.

Schedule

- Ongoing schedule, updated for this week
- Status of next deliverable

INSuRE Project Progress

Project: _____ Date: _____

This Week's Progress

- Wrote some things
- Found some results

Next Week's Work

- Write more things
- Find more results

Impediments/Problems/Issues

- Existential angst
- Angry badgers

Other Questions

- Is the hokie pokie what it's really all about?

Example Dashboard Report

Please follow this format exactly. You can add additional slides if you want to put in more detail, but the first two slides must look like the example and provide enough detail so the reader can see what you have done, what you plan to do, and any problems you are facing.

What follows is an example from one of the Purdue projects.

Remember to delete this slide and the ones that follow ***before*** you turn in your dashboard report

INSuRE Project: “Coping Mechanisms in Password Selection”

Date:
11-06-2014

Brian Curnett, Teri Flory, Trent Pitsenbarger and Bill Layton at the NSA

Overview of project

- Collect passwords over five to seven modifications, within a specified password policy, and analyze whether coping mechanisms are utilized by the password creators.

Operational capability and status

- Proposal, Literature Review, and paper outlining plan have been completed
- Meetings with IRB and Stat Consult have been completed
- Need to finalize IRB application and data management plan

Technical approach

- Create website for users to log in and enter passwords
- Create data management excel spreadsheet
- Create initial and final surveys
- Analyze data from surveys and passwords from log ins

Schedule

- Submit IRB Application
- Meet with Website Developer
- Create website
- Create M-Turk HITS
- Data Collection
- Data Analysis

INSuRE Project Progress

Project: Coping Mechanisms in Password Selection Date: 11-06-2014

This Week's Progress

- Met with IRB and submitted IRB modifications
- Attempted to arrange meeting with TDs and professors
- Team meeting with Professor Foreman on 11/5
- Continued work on website
- Gave presentations to the class and TDs
- Confirmed process of hosting website (on personal Purdue site as opposed to on Insure's website)

Next Week's Work

- Attempt to arrange a meeting with the TDs and professors for 11/12
- Finalize website
- Finalize MTurk HIT and Link
- Begin typing final report

Impediments/Problems/Issues

- Finding a Website Designer
- Time
 - IRB process/approval could take up to two months
- Finding enough participants

Other Questions

- Will Mechanical Turk provide enough participants?
- Will a consent form advising of the subject matter change the passwords created?
- What is the estimated cost for Mechanical Turk?
- What is the timeframe for IRB approval for MTurk?
